

ABOUT ME

I am a product designer with experience in creating web interfaces, B2B services, and job-tech products at the MVP stage. Before transitioning to design, I spent 4 years in B2B sales, managing deals and participating in tenders and presentations. This background helps me better understand business challenges, user needs, and design interfaces from the client’s perspective.

WORK EXPERIENCE

2 years 2 months

Product Designer

VAITI

• November 2025 – Present

What I did:

- Joined as the sole designer at the MVP stage. I rethought existing concepts, established product logic, and designed all key scenarios from scratch.
- Developed 6 modules: job aggregator, company directory, competency catalog, interview simulator, cover letter generator, and resume enhancement tool.
- Created a design system with a complete set of component states tailored to frontend development needs.

Achievements:

- Advocated for key UX solutions with the business: added a dedicated job page and redesigned the application flow to eliminate dead ends for users.
- Designed a swipe mode for viewing job listings – a differentiating interaction pattern not adopted by direct competitors.
- Fully prepared the product for development: handed over all scenarios, screens, and an adaptive UI Kit to the team.

UX/UI Designer

Retoo

• April 2024 – November 2025

What I did:

- Designed and illustrated multi-page corporate websites and e-commerce platforms in collaboration with a Senior Frontend Developer.
- Developed concepts for complex B2B interfaces.
- Adapted existing desktop layouts for mobile devices and tablets.
- Organized Figma files: compiled components, configured styles, and prepared layouts for handoff to development.

Achievements:

- Developed and handed off multi-page websites to the development team.
- Designed layouts with strict adherence to layout constraints, collaborating closely with an experienced developer.
- Redesigned and updated over 30 outdated pages and interface blocks on active projects.
- Showcased complex interface concepts on Behance.
